Education

INSA Lyon | Master's Degree in Computer Science (Diplôme d'ingénieur)

[Lyon, France](#) | 2022 – 2025

- Focus: Data Engineering

Université Paris Saclay | Associate's Degree in Computer Science (DUT)

[Paris, France](#) | 2020 – 2022

- Focus: Software Development and Web Development
- Valedictorian

Experience

EY | Data Consultant for Financial Services

[Paris, France](#) | February 2025 – Present

- Joined EY as a Data Consultant Intern before conversion to full-time consultant within the Financial Services practice.
- Administer and manage the Google Cloud Platform (GCP) sandbox used for internal data and AI tool development, ensuring secure and efficient environments for teams.
- Supported a large insurance client in the migration of its analytical platform from SAS 9 to SAS Viya (AWS / EKS).
 - Conducted data audit & lineage analysis, rationalizing 2M objects (70TB) into 45K business-relevant assets (21TB).
 - Designed and delivered user training sessions to support adoption of SAS Studio and new analytical workflows.

CNRS, LIRIS | Research intern in decentralized systems

[Lyon, France](#) | June 2024 – September 2024

- Searched state of the art incentive methods to guarantee the quality of resources in decentralized marketplaces.
- Analysis of attack scenarios and development of a model based on game theory to anticipate strategic behaviors.
- Design and simulation of incentive mechanisms to ensure governance without having information on the individual behavior of the actors.

Ki Foundation | Data engineer intern

[Paris, France](#) | June 2023 – August 2023

- Forked a Cosmos blockchain indexer and adapted it to the Ki Chain.
- Extracted transaction data, indexed it, and distributed it through a REST API.
 - Achieved significant improvements in query efficiency and minimized node overload.

Fayat, Razel-Bec | Data engineer intern

[Paris, France](#) | May 2022 – July 2022

- Extracted, transformed, and loaded real-time operational data from construction equipment to create usable datasets.
- Developed and deployed a REST API and a dashboard for fuel consumption data analysis, enabling sustainability audits and operational optimization.

OnTable | Co-Founder and Full-Stack Developer

[Roanne, France](#) | July 2020 – July 2021

- Developed a contactless digital menu platform for restaurants using Python Django, and hosted the service on AWS.

Skills

Tools

Python, R, SQL, NoSQL,
Pandas, Apache Airflow,
Postgres, MongoDB, Redis,
REST API, Docker, Git, GCP,
Databricks, Linux.

Concepts

ETL/ELT, Pub/Sub, Data
Pipelines, Warehousing, Data
Lake, Batch & Stream
Processing, Big Data,
Distributed Systems, Disaster

Recovery, High Availability,
Scalability, Agile & Scrum,
Version Control, CI/CD.

Languages

Fluent in French and English.
Proficient in Chinese.
Beginner in German and
Estonian.

Interest

Sport

Very fond of cycling and
calisthenics.

Gaming

Couch gaming, board games
and game nights.

Blockchain Enthusiast

Excited about blockchain
potential across industries.

Financial Markets

Active interest in stocks &
options trading strategies.
